

New 100-Hour Service Kits: Second Generation

In the age where maintenance is paramount to the longevity of your motor, we are excited to announce an our updated Maintenance Kit lineup—the all-new second generation 100-Hour Service Kits. With the introduction of these kits, Yamaha helps to fulfill our commitment to our customer base to consistently improve our product offering in an ever-evolving marine industry.

These kits were designed to meet the demands of some of our most popular engines ranging from 75 horsepower to 350 horsepower. Within the lineup there are three kits:

- **6HV-W006B-00-00**
- **6HP-W006B-00-00**
- **6CL-W006B-00-00**

Please refer to the fitment chart below for details on each part number.

Maintenance Kit Description

Refer to this chart for a full description of what is included in each Service Kit.

Applicable Models	Service Kit	Material Description	Qty.	
F75LB	6HV-W006B-00-00	Oil Filter	1

		Primary Fuel Filter O-Ring Replacement	1
		Propeller Cotter Pin	1

Maintenance Kit Components

Each kit includes all the hardware to replace the oil filter, fuel filter, applicable gaskets, and cotter pin. These kits were designed for our customers to use every 100 hours or each year—whichever comes first.

What Is the Application?

No matter if you are at a dealership streamlining your order fulfillment, a Do-It-Yourself (DIY) owner looking to maintain their outboard, or on a dinghy servicing a boat in-water at a Marina, these kits bridge the gap by providing the replacement components needed for success. Not only do you have what you need in a single kit for this service interval, but it is also accomplishing this at discounted rate from the cost of buying all the parts individually. This is a win-win not only for Yamaha, but the consumer as well.

Introducing reliable products to the marketplace such as our outboards and providing the necessary parts, such as these maintenance kits, will provide a better overall customer experience on the water. Many thanks to the men and women at the Yamaha Global Parts Center who have made this idea a reality for us. We look forward to serving our customers by providing the best parts and service each and every day.
